

# HEY LOUISIANA, LETS GET SCREENED FOR BREAST CANCER THIS OCTOBER!

## Breast Cancer Screening Recommendations:

Average risk women between 40-74 should get a mammogram every 2 years. \*

- \* If you are younger than 40 and are experiencing symptoms such as lumps, pain, or any other unusual changes in breasts, you may need a mammogram.
- \* If you have a family history of breast cancer, known genetic markers for breast cancer, or radiation therapy to your chest before the age of 30, you will need to talk with your doctor to get a tailored screening plan.
